CloudFlow Revenue Operations - Executive Summary

Q2 Performance

Metric	Result
Q2 New ARR Target	$1,500,000
Q2 Actual New ARR	$1,120,000
Revenue Gap	($380,000)
Target Attainment	74.70%

Key Findings

Key Finding	Result / Insight
Segment Performance	Small Business: 28% win rate; Mid-Market: 20%, higher deal value
Deal Slippage	44.74% of won deals closed later than expected; Mid-Market reached 60%
Forecast Reliability	Only 14.39% of Commit deals became Closed Won, indicating overly optimistic forecasting
Retention	NRR: 93.06%; Small Business NRR: 84.33%
Main Churn Drivers	Budget reduction: $162K; Low adoption: $128K

Q3 Outlook

Metric	Result
Q3 Target	$1.60M
Opening Pipeline	$4.40M
Pipeline Coverage	2.75x
Conservative Forecast	$1.233M
Expected Forecast	$1.978M
Optimistic Forecast	$2.813M

Recommendations

Recommendation	Action	What to Do
Improve Lead Funnel Performance	Lead quality varied significantly by source; some sources generated leads but converted poorly from SQL -> Opportunity	Spend more effort on lead sources that actually create opportunities. Reduce focus on sources that generate many leads but few opportunities.
Improve Forecast Discipline	Tighten Commit criteria and review forecast categories weekly	Don't put a deal in **Commit** unless there is strong evidence it will close. Review Pipeline / Best Case / Commit every week.
Reduce Deal Slippage	Focus on Mid-Market deals and flag opportunities at risk of missing expected close dates	Find deals that may close late **before the deadline** and have Sales follow up on them.
Improve Small Business Retention	Prioritize low-adoption and at-risk customers before renewal	Find Small Business customers who **don't use the product enough** and contact them before renewal to reduce churn.
Prioritize Q3 Pipeline	Focus Sales on high-value, late-stage opportunities to protect the $1.6M Q3 target	Don't treat all 77 deals equally. Focus first on **larger deals that are closer to closing** to help reach the $1.6M target.
